

Model 405Q/406Q

High Power AO Q-Switched Nd: YAG Lasers

These lasers combine high efficiency laser head design with dual high power Q-Switches to achieve exceptionally high Q-Switched output levels. With 60 mj pulse energy & nearly 1 MW peak power, the 406Q is the highest output AO Q-Switched laser available. Typical applications include: Laser Ablation, Surface Treatment and High Power Laser Marking.

TYPICAL OUTPUT DATA

U.S. LASER CORPORATION

825 Windham Court North, Wyckoff, NJ 07481
